- Forensic Analysis

At eSecurity Solutions, security is our only business. Since 2003, we have focused exclusively on products, services and managed services especially for business. We don't sleep until your data and business is secure and compliant.

Complete Endpoint Security Made Easy

The Endpoint is a Growing Threat Vector

Endpoint security is anything but static. Just protecting against realtime zero-day threats is enough of a challenge all by itself. Add to that the need to protect against Web, email, mobile and data leakage and you can see why this is a quickly evolving security category. While it is easy to get inexpensive antivirus solutions, they will not protect against all these threats and make it easy to manage.

Web Protection is Not an Option

With invisible threats on Web sites and malicious and phishing email links, Web protection is not an option. Companies need the best Web usage protection they can get. Clicking on malicious links exposes vulnerabilities in Web browsers, browser add-ins, applications like Microsoft Office and Acrobat as well as in the operating system. With multiple zero day attacks launched each year, users need real-time protection that rely on behavioral analysis, reputation analysis and knowledge of in the wild exploits.

ENDPOINT SECURITY RISKS

- Malware, Bots, Rootkits
 - Zombies, Data Harvesting
- Insecure Web Browsing
- Data Leakage
 - USB, Email
- Mobile Threats
 - Lost or Stolen Laptops
 - Web Hotspots
- Web Browser Attacks
- PC Application Attacks
- New Macintosh Attacks

Data Loss Protection Stops Accidental Leakage

Preventing data loss is a real challenge with mobile devices, mobile storage, lost laptops and email. While all endpoint solutions attempt to protect you against malware, the ability to protect against data leakage from USB storage or confidential data sent by email is a new protection method that can be included with endpoint security. Scanning outbound emails for social security #s, credit cards or confidential documents may be important to your organization.

Mobile Device Threats Important New Consideration

Mobile devices can be lost or stolen and can have uncontrolled access the internet or networks. Optional data protection software will encrypted laptops, files or folders and can enhance laptop and endpoint and data security. Additionally, buying a dedicated mobile security solution can help control iPads, iPhones and other mobile personal devices.

Cloud versus On-Premise

Endpoint security solutions can now provide the option of cloud management or on-premise management. Once installed, cloud management provides more convenient access from anywhere. However, features vary on cloud vs. on-premise so ask us to provide you with the solution that best fits your needs.

Managed Endpoint Security Services

MANAGED SERVICES

- Secure Policy Creation
- Secure Setup
- 24 x 7 Monitoring
- Alert Response
- Security Tuning
- Configuration Changes
- Maintenance & Updates
- Reports
- Support

BENEFITS

- Complete Enterprise Level Security
- Expert Management
- Ongoing Maintenance & Support
- No Headaches

Complete Endpoint Security

eSecurity Solutions provides best of breed endpoint security solutions from the leading vendors in the industry. Both SaaS and on-premise management solutions are available. Customers can choose from optional features in addition to anti-malware and Web browsing protection. If you need the features in this list, we can provide them.

Managed Services Removes the Headaches

Wrap expert eSecurity Solutions Managed Endpoint Security Services around award winning SaaS and on-premise Endpoint security solutions, and you have the best possible security with complete peace of mind. We work with you to define best practice policies, then implement, monitor 24 x 7 and maintain your email security. We are there for you when you need us with expert advice & services.

DO YOU NEED THESE?

- Malware Protection
 - Spyware, Bots, Rootkits
- Web Safe Browsing
- Cloud Reputation Checking
- Gateway Email Protection
- Protect Roaming Users
- Data Loss Protection
 - Encrypted Mobile or Files
 - USB Device Control
 - Email DLP
- Cloud or On-Premise Mgt.
- PC, Servers, Exchange, Mac
- Managed Services w/24 x7
