

# Managed Web Application Security Services

Managed  
Web  
Application  
Security

Defend Your Organization  
Against Website Attacks

For organizations that want Complete Managed Web Application Security.

## Web Application Security is Essential

Web application attacks are one of the most serious risks in today's threat landscape. They are prevalent—seven out of ten environments will be attacked an average of 40 times during a year—and they're dangerous, implicated in many high-profile data breaches. From SQL injection attempts to cross-site scripting exploits, protection is essential.

Web Applications are one of the most serious threats.

7 out of 10 environments will be attacked 40 times during the year

### Key Advantages:

- Proven Website and Web Application Protection
- Security-As-A-Service Delivery
- 24x7 state-of-the-art Security Operations Center
- Compliance Support
- Improved Website User/Visitor Experience
- Secure, Non-Invasive Deployment Options

Web application firewalls (WAFs) are an ideal technology for defense—able to understand incoming traffic and intercept attacks, they're a practical approach to guarding your applications and data. However, they also require expert tuning and management to be effective; otherwise, they impact site availability by blocking legitimate traffic or are tuned down to a level where they are no longer effective.

## eSecurity Solutions' Complete Web Application Security

eSecurity Solutions provides its customers four distinct advantages: market leading security tools, a fully managed SaaS delivery model, integrated 24x7 Security Operations Center (SOC) services to monitor and provide expert guidance, and it is deployable anywhere a customer has IT infrastructure – including the cloud.

eSecurity Solutions Managed Web Application Security Services delivers on the WAF promise. The first fully managed Security-as-a-Service WAF, Web Security Manager provides:

- Proven WAF technology that block attacks with negative and positive security features and learning that adapts to your traffic patterns
- PCI DSS 6.6 compliance without code reviews
- SaaS delivery that removes typical WAF management headaches
- Non-invasive, no-downtime deployment, providing the optimal mix of security and ease of implementation
- Managed services that extend your capabilities with tuning, monitoring, alerting, expert guidance and assistance with incident remediation by certified security analysts
- Superior value, leveraging eSecurity Solutions' investment in highly available infrastructure, security technology and expert staff for a monthly fee—with no capital expenses

At eSecurity Solutions, security is our only business. Since 2003, we have focused exclusively on products, services and managed services especially for business. We don't sleep until your data and business is secure and compliant.

# Managed Web Application Security Services

## Our Full Line of Managed Security Services includes:

- Firewall/VPN
- Endpoint Security
- Email Security
- Web Security
- Access Control
- Intrusion Detection
- Vulnerability Scanning
- SIEM Security Monitoring
- PCI Compliance

## Managed Services Removes the Headache

eSecurity Solutions Web Security Manager deploys on-premise, in hosted environments or in the cloud, without complex integration. Now you can protect your web applications and sites with proven technology and expert staff without the difficulties usually experienced with web application firewalls. Let eSecurity Solutions help manage your web application security services. We can work with you to define best practice policies, then implement, monitor 24x7 and maintain your web application security. We provide scalable solutions that fit small, medium, and enterprise businesses. Additionally, we offer flexible pricing models that include annual, quarterly, and monthly options. We are there for you when you need us with expert advice and services.

### eSecurity Solutions Can Manage it All

- 24/7 monitoring keeps you protected
- Web security analysts identify unusual activity, investigate, and make corrections
- Rapid responses to inbound incidents
- Ongoing tuning to maintain WAF performance
- Proactive WAF changes when your application code changes

## Why eSecurity Solutions?

- Security Experts for over 10 Years
- We are vendor certified
- We work with top tier vendors in the industry
- We have a strong customer base

## Features & Key Benefits

- ✓ **Web Security Manager protects** your websites and business-critical applications from web application attacks, including zero-day exploits and emerging threats.
- ✓ **Fully managed Security-as-a-Service delivery** means fast, simple implementation with no capital expenses and predictable monthly fees—no software upgrades.
- ✓ **eSecurity Solutions services provide 24x7 monitoring** and incident escalation by our certified security analysts, along with ongoing tuning and management.
- ✓ **Web Security Manager provides immediate PCI DSS compliance**, along with support for other compliance mandates.
- ✓ **Intelligent caching provides a superior site visitor experience**, with scalability limited only by hardware and network.
- ✓ **Implement on-premise and in hosted and cloud environments** with our non-invasive, no-downtime deployment mode, providing industry-leading security without physical network changes.
