TESTIMONIAL

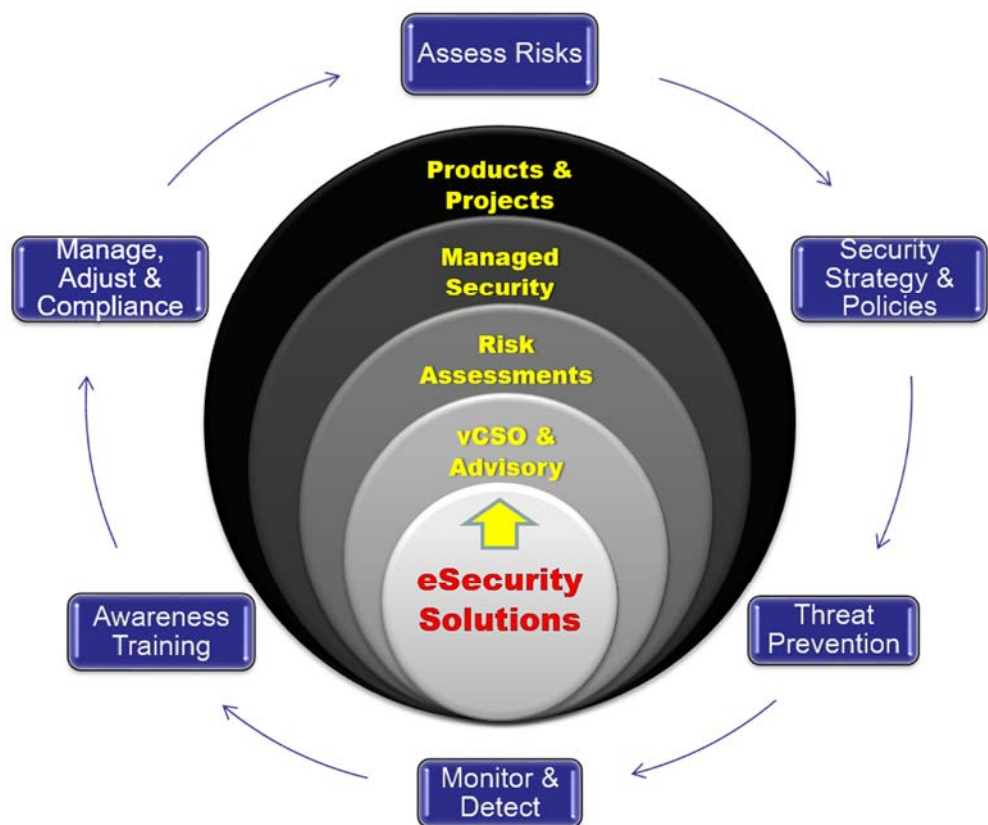

"eSecurity Solutions is a valuable asset to the YMCA of Metropolitan Los Angeles and provides the Y with a one-stop security partner that understands the business of the YMCA.

YMCA of LA

eSecurity Solutions mission is to provide compliance level security solutions to your business and to be your expert security partner. We can do that by providing a full complement of services and products that will help you to achieve your security goals.

We can assist you in all areas of security management. Starting with *security risk assessments*, we can audit your security strategy, needs and current implementation and provide you with a prioritized list of vulnerabilities and required solutions. Our services are designed to meet your regulation compliance and security objectives. We are fluent in all major security regulations such as HIPAA, PCI, banking regulations, and international standards such as ISO.

With the assessment results, we can help you define your strategy and can even act as your *Virtual CSO* acting in whatever advisory capacity you require. We will recommend appropriate product solutions that match your security gaps and your budget.

To help with your product management needs, we can provide *expert vendor certified product implementation services*. Our security technicians are trained and certified on a multitude of leading security products to provide the most security results.

For a more complete solution, our expert *managed security services* provide complete policy definition, setup, management, maintenance and support. The following chart lists our complete line of managed security services.
