

Secure Infrastructure & Network Services

Secure Infrastructure Services

Outsourced Critical Services:

- Onsite Services
- Remote Services
- Projects
- Managed Networks
- Managed Servers
- Compliance

We can Also Provide

- Security Risk Assessments
- Security Audits
- Penetration Tests
- Vulnerability Assessment
- Managed Security
 - Firewalls
 - WAFs
 - SIEM Monitoring
 - Backup and DR
 - Security Awareness
 - Phishing Testing
 - Endpoint and EDR
 - Cloud App Security
 - 2-Factor Auth.
 - Cloud Data Center Sec.
- Compliance Solutions
- VCSO
- Forensic Support

Services to Secure Your Networks, Servers & Devices

eSecurity Solutions takes a unique approach to IT infrastructure security for its business customers. We focus on “security” in all things that we do. We integrate our deep knowledge of cyber security to secure servers and provide network security for your entire network and network devices.

We offer a broad line of solutions in the Secure Infrastructure area. We are experts in secure servers, networks, Wi-Fi, endpoints, network devices and even how to secure IoT devices. We can assess, plan, deploy and help maintain your infrastructure and network in addition to the other value-added security solutions we provide. Here are a few of the secure network services and infrastructure security solutions we provide.

- Secure Server Installation, Configuration and Support**
- Secure Office 365 Deployments and Migrations**
- Secure Network Services & Networking**
 - Network Relocation
 - Secure Network Design
 - Network Assessments
 - Secure Installation, Migration, and Maintenance
- Endpoint & EDR Security Deployment and Administration**
- Backup & Disaster Recovery**

Network Security, Infrastructure & Server Security Solved

The following is a more detailed description of each secure infrastructure and network services solution we provide.

- Secure Server Installation, Configuration and Support**
 - Securing Linux & Windows Servers
 - On Premise and Private/Public Secure Cloud Servers
 - Server Virtualization, Deployment & Management in Private or Public Cloud
- Secure Office 365 Deployments and Migrations**
- Secure Networks & Networking**
 - **Network Relocation**
 - Support your infrastructure relocation effort
 - **Secure Network Design**
 - **Securely Assess, Design, Implement and Maintain Networks**
 - Computer Network Services
 - Wireless Devices and Networks
 - Mobile Devices
 - Network Security Devices (Firewalls, WAFs, SIEM ...)
 - **Network Planning and Deployment**
 - **Network Administration and Maintenance**
 - Network Troubleshooting

Secure Infrastructure & Network Services

COMPETENCIES

Firewalls

- WatchGuard
- Fortinet
- Sophos
- Cisco
- Others

Switches

- Cisco
- NetGear
- Edgework
- Dell
- Force-10

WIFI

- WatchGuard AP
- Fortinet FortiAP
- Sophos AP
- Ruckus
- Ubiquiti

Servers

- Microsoft Windows & Linux
- Hyper-V, VMware

Public Cloud

- Amazon AWS
- Microsoft Azure

Backup and Recovery

- Infracore
- VEEAM
- Others

Endpoint Security

- Sophos/Invincea
- Trend Micro
- Others

VOIP

Risk Assessments

Compliance

Managed Security

Cloud Security

Network Security

Realtime Threats

Computer Learning/AI

Network & Asset Mgt

☑ Network Assessments

- Asset Discovery & Inventory
- Asset Detail and Summaries
- Site Diagrams
- Network Security Risk Assessments
 - Servers, Workstations, Mobile, IoT
- VOIP Security
- Network Internal and External Vulnerability Scans
 - Patch Levels
 - Vulnerable systems, Devices and Users
 - Recommended Mitigation
- Network Penetration tests
- BDR- Backup & Disaster Recovery Report
 - Device and Storage Requirements
 - Network speed
 - Cloud and Local Apps to Backup
 - Current Backup Analysis
 - Issues Report

☑ Secure Installation, Migration, and Maintenance

- Network Firewalls
- WIFI Access Points
- VoIP Systems
- Servers: Windows, Hyper-V, and VMware
- Endpoint & Mobile Device Security

☑ Endpoint & EDR Security Deployment and Administration

- Security Solutions to Protect, Detect, Mitigate and Provide Forensic Data for Endpoints

☑ Backup & Disaster Recovery (See Also BDR Managed Services)

- Custom Solutions to provide Onsite, Offsite System and Data Backup with "Instant" Recovery

☑ Managed Networks, Servers, Endpoint Security

- Use us to manage your critical infrastructure for a secure environment

Providing your Company Expert Secure Infrastructure Services

We are available to help you with projects, hourly or managed solutions for your critical infrastructure.

Call us today to discuss how we can help you secure your networks, servers and devices.
