

Managed Detection & Response Services

MDR Services

For organizations that want a truly secure environment managed by experts

Is This You?

- Lack expert security resources?
- Don't have an In-house SOC?
- Have other areas you want your IT team to focus?
- Want best-in-class security?
- Need to be regulation compliant

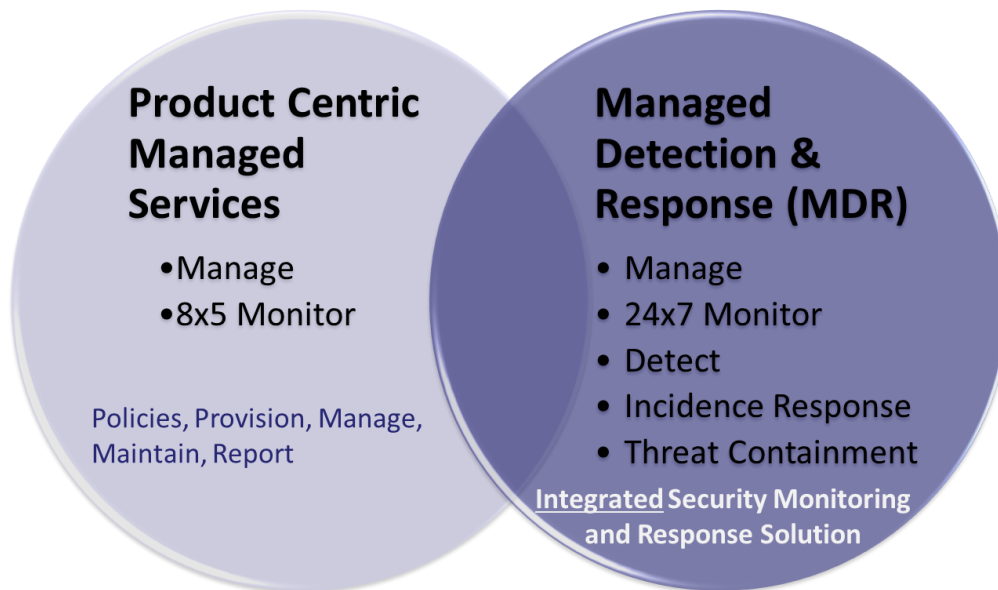

Call Us Today!

At eSecurity Solutions, security is our only business. Since 2003, we have focused exclusively on products, services and managed services especially for business. We don't sleep until your data and business is secure and compliant.

24x7 SOC Managed Integrated Security with Detection, Response & Threat Containment

Complete Management of Your Security

Pick Product to Manage Individually:
SIEM, Firewall, WAF, MFA

SIEM + Firewall + EDR
Optional: MFA, WAF, Patching

MDR services are a step up from product-centric managed security services in that the focus of MDR is to provide you with a secure integrated infrastructure that manages, monitors and contains threats or attacks without your intervention. Once we see a threat, we analyze it and determine the best way to quickly contain it. At that point, we notify you and then the proper course for any further remediation can be determined.

eSecurity Solution's MDR services provide 24x7 monitoring of the MDR security stack. The core managed detection and response security stack includes the #1 SIEM solution (IBM QRadar on Cloud), plus a choice of industry leading UTM firewalls and an EDR level endpoint security solution. Combined, we can monitor your core security and add other security solutions for MFA, WAF, patching etc. The result is a robust integrated security solution, managed and monitored by experts.
