Managed Endpoint: EDR Security Services

Protection, Detection, and Response

The Endpoint is a Growing Threat Vector

Endpoint security is anything but static. Just protecting against real-time zero-day threats is enough of a challenge all by itself. Add to that the need to protect work-from-home users against threats from Web, email, mobile, network and data leakage and you can see why this is a quickly evolving security category. While it is easy to get inexpensive antivirus solutions, they will not protect against all these threats.

Benefits of Managed EDR

- Complete Enterprise-Level Security
- Expert Management
- Ongoing Maintenance & Support
- The Ultimate Solution for Endpoint

Protecting Against Invisible Attacks

With invisible threats on Web sites and malicious and phishing email links and attachments, protection is an ongoing challenge. Companies need the best Web usage protection they can get. Clicking on malicious links and opening attachments exposes vulnerabilities in Web browsers, browser add-ins, applications like Microsoft Office and Acrobat as well as in the operating system.

Managed Endpoint Security Features

- Malware Protection (Ransomware)
- Web Safe Browsing
- Email Protection
- Protect Roaming Users
- Protect Home Users
- Data Loss Protection
- PCs, Servers, Cloud
- Manage Services (With 24x7)
- EDR Management

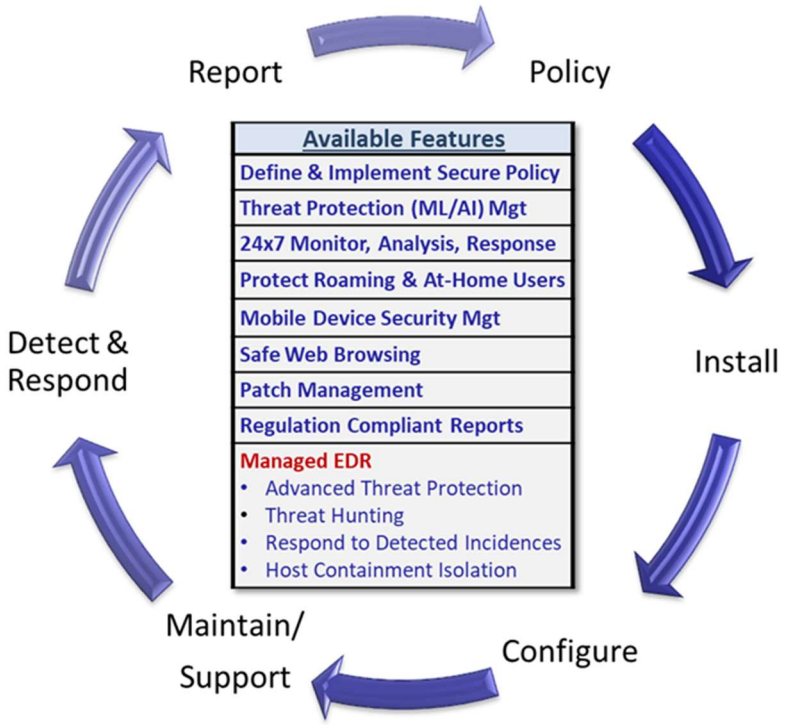
Protecting Remote Users

Employees working from home present a new threat to company security. Users are no longer guaranteed to be behind the corporate perimeter or on the corporate network. Thus, the need for each employee to have the most advanced endpoint security to protect from email, web, malware, network, and hacking threats.

Managed Endpoint/ EDR Security Services



ENDPOINT MANAGEMENT CHALLENGES

- Installation & Upgrading
- Data Protection
- Mobile Device Mgt
- Patch Management
- Web Browsing Security
- Adding/Removing EPs
- Ongoing Management
- Reporting & Compliance
- Threat Detection
- Threat Response
- Forensic Analysis

Advanced Malware & Ransomware Protection

A new generation of advanced malware including ransomware is causing an increasing threat. Morphing malware, fileless attacks, compromised websites and email attacks present the need for sophisticated dynamic endpoint security. The development of AI and machine learning solutions has been added current endpoint security to detect advanced malware that is undetectable by signatures. The latest generation of Endpoint Detection and Response (EDR) solutions, assume all attacks cannot be prevented and thus detection and response technology must be added to detect and block attacks before they cause damage.

Managing Endpoint & EDR Solutions is a Challenge

Managing these new advanced endpoint solutions is not easy. Most companies cannot afford the staff to provide 24x7 monitoring and management of sophisticated EDR solutions. Yet, the endpoint is the new center of the security universe for companies and requires the most sophisticated solutions and the most rigorous management.

Managed EDR Provides 24x7 Endpoint Detection & Respond

Wrap expert eSecurity Solutions Managed Endpoint Security Services around award winning Endpoint and EDR security solutions, and you have the best possible security with complete peace of mind. We work with you to define best practice policies, then implement, monitor, detect threats and block attacks on your endpoints so that they do not propagate across your network. When threats are detected, we analyze the IOC and IOAs using threat hunting, and recommend the appropriate long-term solutions. We are there for you when you need us with expert advice & services.

Endpoint (EP) Security Management

Endpoint Detection & Response (EDR) Security Management

Complete Endpoint Security

eSecurity Solutions resells best of breed endpoint & EDR security solutions from the leading vendors in the industry. These solutions employ AI & machine learning and advanced detection and response features. Then we go the next step and manage these solutions for our customers. At eSecurity Solutions, security is our only business. Since 2003, we have focused exclusively on products, services, and managed services especially for business. We don't sleep until your data and business is secure and compliant.
